

Hangxu Sha

📞 236-513-1888 — ✉️ hsha4@my.bcit.ca — 🔗 [linkedin.com/in/levi-sha](https://www.linkedin.com/in/levi-sha) — 🐙 github.com/1ucifer-m — 📍 Richmond, BC

Skills

Hardware Skills Proficient in circuit design, soldering, PCB assembly, troubleshooting

CAD-Software KiCad, AutoCAD, SketchUp, SolidWorks
Programming Python, AHDL, Java, C/C++ ,SystemVerilog

Education

British Columbia Institute of Technology

Electrical Computing Engineering Technology Program

Sept 2025- May 2029

Burnaby, BC

- Simulated circuits within LTspice and Falstad
- Implemented AHDL and schematic code using CPLD
- Collected data using Excel and inputted formulas to calculate accurate data points

Canada Star Secondary School

Dogwood Diploma

Sept 2021- Jan 2025

Richmond, BC

Academic Projects

Logic Gate RC car

BCIT Electronic Circuits Course

Jan 2026 – Present

Burnaby, BC

- Created schematics using LTspice
- Implemented an H-bridge to spin the wheels
- Engineering a design to use MOSFETS as switches to change the frequency

AC to DC Power Supply

BCIT ELEX Fabrication Course

Sept 2025 – Present

Burnaby, BC

- Designed PCB and schematics using KiCad
- Soldered components onto PCB and debugged connections using a DMM
- Modified chassis using SolidWorks
- Constructed a final product that converts AC 120 V into variable and constant DC with a built in fuse and grounding to prevent injury

Fully Working Java Platformer Game

High School Capstone Project

Sept 2023 – Jan 2024

Richmond, BC

- Debugged and optimized the update loops for smoother gameplay
- Implemented gameplay mechanics such as player movement, gravity, and collision detection using object-oriented programming
- Designed and developed a simple game engine to manage audio, input handling, and game state transitions
- Integrated sprite images and tile maps to enhanced visual quality and animation fluidity

Volunteer Experience

Volunteer

Social Diversity for Children Foundation

Apr 2022- May 2023

Richmond, BC

- Dedicated 25+ hours per month to coordinating and selling donuts at public transit locations
- Helped host a charity event, accommodating a few dozen attendees

Camp Assistant

Spring Science Camp

Feb 2022

Richmond, BC

- Assisted students with understanding and using the material on rover designs to collect data from Mars, made from aluminum, popsicle sticks, and tape
- Encouraged collaboration and leadership among campers while addressing questions and challenges with bottled rockets

Intrests

- Racket sports enjoyer, played badminton for half a decade
- Coding enthusiast, Currently trying to slowly learn HTML and CSS to create a protfolio website for my projects
- Music lover, over 100,000 minutes listened last year
